What Is Sadhesati

Sadhe Sati refers to the seven-and-a-half year period in which Saturn moves through three signs, the moon sign, one before the moon and the one after it. Sadhe Sati starts when Saturn (Shani) enters the 12th sign from the birth Moon sign and ends when Saturn leaves 2nd sign from the birth Moon sign. Since Saturn approximately takes around two and half years to transit a sign which is called Shani's dhaiya it takes around seven and half year to transit three signs and that is why it is known as Sadhe Sati. Generally Sade-Sati comes thrice in a horoscope in the life time - first in childhood, second in youth & third in old-age. First Sade-Sati has effect on education & parents. Second Sade-Sati has effect on profession, finance & family. The last one affects health more than anything else.

Your Ascendant (also known as your Rising sign) is the first impression others have of you, before getting to know the 'real' you. Becoming acquainted with one's Rising Sign (which is only possible if your exact time of birth is known), can help you figure out what your soul is drawn to, and it also reveals ways you may feel 'seen' by others, and by the world. With your Ascendant in Scorpio, you exude a magnetic, mysterious vibe. People sense your depth from a mile away—you're like a walking enigma, and you probably like it that way. You have this ability to make others feel seen, yet you rarely let anyone see all of you. Power dynamics are a thing with this placement, and sometimes you find yourself testing loyalty or holding onto secrets a bit too tightly. The truth is, vulnerability is your superpower. Your life lesson involves learning that true strength lies not in what you hide but in what you're brave enough to show. When you trust yourself enough to let others in, you unlock a whole new level of intimacy and transformation.
